

About us

Our mission is to design wearable computers and IoT devices

We design, develop and produce devices for enterprises who want to benefit of Augmented Reality and Artificial Intelligence wearable electronics in Industry 4.0 environment.

Youbiquo – a company founded on December 2013 and working in the Smart Glasses market- made “**Talens**” **Smart Glasses**, a wearable computer equipped with **Augmented Reality** and **Artificial Intelligence** features; since 2015 we provided prototypes to various customers in the Maintenance sector of large enterprises. Since 2014 the company is listed in the special register of Italian Chamber of Commerce as **Innovative Startup**; since december 2018 is registered as **Innovative SME**. In May 2018 Youbiquo achieved a “**Seal of Excellence**” awarded by the European Commission for product innovation proposed.

The company currently has investment programs of Research and Development funded by Italian Ministry of Industry (**MISE**), Italian Ministry of Research (**MIUR**) and **Campania Region**, for a total of **1.5 Million Euro**, in partnership with large companies, such as **Leonardo** company and **Ericsson Telecommunications**.

Youbiquo, in addition to Augmented Reality Smart Glasses, whose new model “Talens Holo” is planned to go to market by 2019, provides consulting services for design and prototyping of wearable electronic devices and **IoT devices**, equipped with software applications. Smart features on board of our wearable/IoT devices are driven by **Augmented Reality and Machine Learning technologies** – i.e. understanding of Natural Language and Object Detection and Tracking.

The team consists of 15+ employees. skilled in software development, electronics design and prototyping, and mechanical product design. Governance is guaranteed by a board of three experienced founders .

The company boosts collaborations with Universities and Research Centers, and participated in acceleration programs in which it was selected in New York (**Venture Out**, 2016, Wall Street) and in Vienna (**Vienna Startup Package**, 2018).

The company exhibited at the main international trade fairs: **Wearable Technologies** in 2016, **Unbound London** in 2017 and 2018, **SMAU Berlin** in 2017 and 2018, **Mobile World Congress** in 2018, **BIAT** in 2018, **Moscow Startup** in 2018, **Wearable USA** in 2018, **Pioneers Vienna** in 2017 and 2018. Planned to attend at **CES 2019** and at **Mobile World Congress 2019**.
